

## **Public Levee Access**

**Not all levees are publically owned.** Some levees are located on private property and RD784 personnel can only access private property because the State of California holds easement rights for levee maintenance and operations.

RD784 cannot give permission for anyone to trespass on private property of another. The following list of levees is provided for information on which levees are open to the **public for pedestrian access only.**

**Unauthorized Motor Vehicles are prohibited on all levees.**

- 1. Western Pacific Interceptor Canal (Unit 4)** – All private property except the first half mile North of Plumas Arboga Rd. to the beginning of the waterside shelf boundary fence which is owned by Sacramento San Joaquin Drainage District (SSDD).
